Josue David Arana

SALESFORCE SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Salesforce Software Engineer with 5+ years of enterprise experience designing and delivering scalable Salesforce solutions across Sales Cloud, Service Cloud, and Experience Cloud supporting hundreds of internal and external users. Experienced in Apex, Lightning Web Components (LWC), Salesforce Flows, OmniStudio, security, data modeling, integrations, and CI/CD within regulated environments. Strong background translating business requirements into technical solutions and collaborating with stakeholders, with experience in code reviews, release coordination, and mentoring engineers.

KEY SKILLS

- **Salesforce Platform:** Apex, Lightning Web Components (LWC), SOQL, SOSL
- **Automation:** Salesforce Flows (record-triggered, screen, autolaunched, scheduled, before/after-save)
- **Security & Data Model:** Permission Sets, Profiles, Sharing Rules, Object Permissions, Field-Level Security, OWD, Role Hierarchy, Custom Objects, Fields, Relationships, Record Types
- **OmniStudio:** OmniScripts, FlexCards, DataRaptors, Integration Procedures, Discovery Framework
- **Experience Cloud & Integrations:** External and guest-user applications, security models, data access controls, REST APIs, DocuSign
- **CI/CD & Testing:** Jenkins, Java, Selenium, Cucumber, Gherkin, ACCELQ, Allure Reports, GitLab, GitHub
- **Dev Practices:** Agile/Scrum, Git, code reviews, release management, requirements refinement

EXPERIENCE

Software Engineer – Salesforce
Fannie Mae | Reston, VA (Hybrid) June 2021 - Present

- Design, build, and maintain enterprise Salesforce solutions within Fannie Mae's ECRM platform, leveraging Sales Cloud and Service Cloud to support hundreds of internal and external users in a regulated environment.
- Develop and maintain two Experience Cloud applications with guest-user access, security models, and custom functionality for complex business processes.
- Develop custom Salesforce functionality using Apex and LWC across enterprise applications and complex business processes.
- Implement process automations using record-triggered, screen, autolaunched, scheduled, and before/after-save Salesforce Flows.
- Built an Experience Cloud and OmniStudio solution digitizing a ~150-field process and reducing processing time from weeks to days.
- Built an Apex and DocuSign integration that automated document workflows and reduced a multi-day process to ~30 minutes.
- Own Salesforce stories through requirements refinement, technical design, development, testing, and production deployment.
- Collaborate with product owners and stakeholders to translate business requirements into scalable Salesforce solutions.
- Coordinated 5 enterprise Salesforce releases and supported 10+ biweekly releases across development, business, leadership, and DevOps teams.
- Mentor engineers and new hires through Salesforce guidance, development best practices, and peer code reviews.

CERTIFICATIONS
